Dynamic resume: <https://aohys.com/resume>

Selected work: <https://aohys.com/case-studies>

Professional summary

Senior Frontend Developer with 9+ years of experience specializing in React, TypeScript, Next.js, product architecture, performance, SEO, and maintainable UI systems.

Proven delivery across enterprise systems, startup products, healthcare workflows, e-commerce platforms, and public business sites, including systems serving 30.5M+ monthly users.

Experienced with Next.js as a backend surface, backend workflow delivery, escalation ownership, payment plans, cashback, customs workflows, and cross-functional product execution.

Modern AI-assisted engineering practitioner using agents, TDD, browser QA, release discipline, observability, and documentation to turn ambiguous goals into reliable software.

Selected impact

30.5M+ monthly users: Contributed to e-commerce platform work at Datazone/AutoZone with SEO, performance, React, and React Native modernization.

80% load-time reduction: Executed major Next.js migration work at Tala Mobile, reducing load times from 3-5 seconds to under 1 second.

Mission-critical dispatch: Implemented keyboard dispatch workflows for a major US emergency response platform with zero-error tolerance requirements.

Public source sample: Built this site as an inspectable source sample for SEO, i18n, content graph, QA, branch protection, and release practice.

Key projects

Emergency Response Dispatch System

Mission-critical emergency response platform used during the pandemic.

- Implemented complex keyboard dispatch workflows with React, Redux Saga, TypeScript, and Cypress.
- Covered dispatch scenarios with comprehensive testing around zero-error tolerance workflows.
- Contributed to software used for coordinating emergency responses.

CARE Customer Support Management System

Enterprise customer support platform with performance-sensitive internal workflows.

- Built and improved React, TypeScript, Redux, and Next.js surfaces for internal teams.
- Reduced page load times from 3-5 seconds to under 1 second through performance-focused migration work.
- Implemented real-time updates and complex state management features.

AOHYS Product Systems

Private and public product work across service business workflows, nutrition workflows, public sites, and this source sample.

- Built public-safe case studies for Casa Roca, The Barber Central, Nutri Plan, enterprise systems, and engineering practice.
- Designed public/private boundaries so portfolio evidence is visible while private client and product work stays protected.
- Uses modern agent-assisted delivery, TDD, browser QA, source-quality gates, and release documentation.

Professional experience

Senior Frontend Developer | Tala Mobile | 2023 - Present

- Executed major Next.js migration work that reduced load times from 3-5 seconds to under 1 second.
- Contributed to CARE internal system development and enhancement.
- Implemented product workflows based on team and stakeholder requirements, including backend-oriented delivery through Next.js surfaces.
- Worked across escalations, payment plans, cashback, customs workflows, and cross-functional delivery.

Senior Frontend Developer | Drift | 2022 - 2023

- Developed and maintained a video recording Chrome extension.
- Built and enhanced analytics dashboards for marketing playbook performance tracking.
- Created data visualization tools for customer interaction insights.
- Optimized dashboard performance and user experience for marketing teams.

Software Engineer | Prenuvo | 2021 - 2022

- Delivered full-stack product features in a fast-paced medical imaging startup environment.
- Implemented critical features for healthcare platform workflows.
- Improved application performance and user experience.
- Collaborated with cross-functional teams to define and ship product functionality.

Engineer Associate System IT-Development | Datazone/AutoZone | 2020 - 2021

- Contributed to e-commerce platform development serving 30.5M+ monthly users.
- Implemented SEO optimizations and performance improvements.
- Participated in systems modernization using React and React Native.
- Enhanced mobile application features and user experience.

Application Development Senior Analyst | Accenture | 2018 - 2020

- Modernized a 30+ year-old legacy application using React and Redux.
- Implemented TDD practices and modern component architecture.
- Mentored team members on React and Redux best practices.
- Collaborated with international teams across multiple time zones.

Senior Software Engineering | NEORIS/CEMEX | 2018

- Developed features for CEMEX GO, serving 12,000+ users across 23 countries.
- Implemented critical bug fixes and performance improvements.
- Refactored legacy code to modern React standards.
- Mentored team members on frontend best practices.

Software Developer | AO HyS | 2015 - 2018

- Founded and operated an independent development studio.
- Delivered custom solutions for healthcare and e-commerce clients.
- Implemented full-stack solutions using React, Node.js, and related technologies.
- Managed client relationships and project deliverables.

Technical skills

Frontend: React, TypeScript, JavaScript, Redux, Redux Saga, HTML5, CSS3, Accessibility

Full-stack and backend: Next.js, Node.js, Java working knowledge, API workflows, Operational backends

Testing and quality: TDD, Cypress, Jest, React Testing Library, Vitest, Browser QA, CI/CD

Product and delivery: Performance optimization, SEO, Server-side rendering, Agile/Scrum, Release discipline, Observability

Modern AI practice: Agent-assisted development, LLM workflows, Prompted implementation review, AI-assisted QA

Education

Bachelor of Engineering, Software Development | UNAD - Open and Distance University of Mexico | 2014 - 2018

Bachelor of Business Administration, Maritime Trade | ITBOCA - Technological Institute of Boca del Rio | 2004 - 2008

Languages

English - Fluent, Spanish - Native
